The "Great Hanshin Earthquake," which attacked Awaji, Kobe, and Nishinomiya early in the morning of January 17, caused the greatest damages in history. The quake was centered in the ocean near Awaji Island, with the epicenter being off the coast of Awaji. Kobe City, Nishinomiya City, and Awaji Town were significantly affected.

Kobe City, located on Sanriku Peninsula, was severely damaged. The city's business district was a near total loss, and many buildings were destroyed. The city's main streets were filled with debris, and many businesses and restaurants were closed.
